CORALS

Diving deep. Deep below the surface into the ocean's silent vastness. There you will meet the underwater world's most delicate inhabitants – the corals. In fascinating forms, they grow more slowly than almost any other creature. Organisms emerge as unique as distinct individual personalities. In all colours of the rainbow, the corals nestle against the hard rock. They are, with their gentle swaying, an expression of uniqueness in nature.

With CORALS, Katharina Tannous has dedicated a FLOORWEAR® piece to this fascinating creature that represents a colourfulness like no other.

This is reflected in the four strong standard colours that make up the colour palette: *tropical reef*, *sepia*, *deep sea pink* and *beach live* from colourful accentuations that could not be more natural and lively.

About kymo

kymo, from Germany, makes contemporary floorwear. Their approach to floor textiles is best summed up by their brand philosophy: 'GO ON. AND CREATE.' kymo collections are distinctly stylish, classy – and cutting edge.

Established in 2005, kymo floorwear is now sold in premium interior design stores in more than 75 countries worldwide. Distinguished brands, like Escada, Mercedes-Benz, and Bugatti, have all used kymo rugs and carpets for their own point-of-sale design or product presentations.
